Howells found the hard drive while cleaning out his desk and added it to a garbage bag that held truly disposable items. That evening, a conversation with his wife concluded with the understanding that Howells would dispose of the bag at the town dump. Although by then Howells had realized he should keep the hard drive, he assumed he would have ample time to retrieve it from the bag. The next morning, his wife, without telling him, drove the bag to the dump. Ergo, a very human and seemingly irreversible mistake. For more information, see D. T.
